Auckland Jacket Men

Fabric 100% polyamid, MPU membrane

Features Auckland jacket offers full weather protection and ticks all the boxes for a coastal jacket in an optimized fit. The jacket is made from durable, but soft 2-layer fabric which is super comfortable to wear. The MPU membrane and DWR finish keep reliably dry and allow to permeate quickly. Fully waterproof taped seams. Construction details: Large Cordura® reinforcement at bottom. Extra high fleece lined collar for wind and spray protection. Fully adaptable highly visible hood tucked away inside collar. Tough 2-way zip at front, covered by double placket. Adjustable double cuffs with soft PU seals inside. Flat pockets at chest. Spacious lower pockets with top and side entry; side entry with fleece lining to keep hands warm. Lining with inner pocket and big mesh area for extra venting.

Safety 3M™ microprismatic reflectors at hood, shoulders and placket

Extras Zip-in system allows to attach optional midlayer insulation jacket "Luca"

RACING TOUR

**OFFICIAL CLOTHING
SUPPLIER**

GC32 RACING TOUR

In a three-year deal, Marinepool becomes the official clothing partner to the GC32 Racing Tour, which attracts some of the world's top sailors. The agreement with the series was signed for 2017 and also grants Marinepool exclusive merchandising rights for clothing. The Marinepool GC32 Racing Tour™ collection has been introduced and incorporates all the speed, advanced technology and thrill of the GC32 Racing Tour Collection™ into a superb collection, which blends function and fashion in a unique style.

Technical shirts are complemented with trousers and shorts of high breathable, water repelling and super flexible fabrics offering unmatched comfort. Hi-tech sailing jackets made from 3-layer highly waterproof and breathable fabrics provide ultimate protection from the elements. And of course the collection is only complete with a set of accessories like bags, caps and more to match the garments. This appointment is another important achievement for Marinepool to further promote its brand on a global scale.

The GC32 Racing Tour is a five event circuit sailed through southern Europe for some of the world's fastest racing catamarans. Sailed by a crew of five, the GC32 is a one design foiling catamaran that bridges the gap between the state of the art AC 50's used in the current America's Cup and smaller foiling catamarans. For its third season, the 2017 GC32 Racing Tour offers the best possible foiling experience for a so-called drivers owner circuit. It will visit venues in Italy, France and Spain that offer the best chance of optimum conditions for high speed foiling sailing. Races on the GC32 Racing Tour are typically short but the venues chosen allow large enough courses to enable the flying catamarans to stretch their legs fully and reach the fastest speed.

BRONENOSEC RACING TEAM (TP52)

RC44 World Champion 2014

Russia has a long history as a successful nation in yacht racing and Bronenosec Racing Team has rightfully earned its name in the history books. The distinctively bright blue yachts campaigned by the St. Petersburg Yacht Club and Commodore Vladimir Liubomirov have been a force to be reckoned with on the grand prix circuits. Bronenosec yachts have won several World Championships in the Gazprom Swan60 Class to which the Club is a huge contributor, won the much coveted RC44 World Championship in 2014 and proved to be one of the top teams in the TP52 Super Series with a new launch in 2015. When this catalogue went into print Bronenosec was leading the 2015 RC44 match racing rankings and was 2nd in the fleet racing scores.

But the club is equally known for its support of youth sailing in Russia with an Academy for youngsters, the Gazprom Youth Sailing Challenge racing in Swan60 and RC44 and not least for a team of young guns in the Extreme Sailing Series skippered by Igor Lisovenko, which showed great sailing in the 2015 season.

Marinepool is proud partner and 'Official Clothing Supplier' of the St. Petersburg Yacht Club and the Bronenosec Racing Teams respectively.

*wide enough to allow several insulation layers underneath / **stretch for elbow-room

	Tough outshell fabric with HB or XPU Membrane. 3L = Outshell + Membrane + Tricot backing bonded together permanently. An additional coating (+1) provides extra salt water protection for the membrane.		MPU Membrane used for 2L fabrics offers reliable waterproofness and high breathability.
	Light, but tough outshell fabric with NX Membrane or other. 3L = Outshell + Membrane + Tricot backing bonded together permanently.		MPU Coating for 2L fabrics offers reliable waterproofness and good breathability.
	Light, but tough outshell fabric with DT Coating. 2.5L = Outshell + Coating + Print (to protect coating = 0,5L).		Durable Water Repellency avoids the outshell fabric surface to be soaked with water, maintaining breathability.
	Durable outshell fabric with Coating or membrane. 2L: Outshell + Coating / Membrane.		Fabric is waterproof as it is outfitted with some kind of waterproof membrane or coating. Watercolumn in mm.
	High Performance hydrophilic PU Membrane is a nonporous membrane which provides very high breathability and waterproofness. Its durable function is based on a physical and chemical principle.		Fabric is breathable as it is outfitted with some kind of breathable membrane or coating. Breathability given as MVTR value (g/m2/24h) or RET value.
	XPU Membrane used for 3+1L fabrics offers extreme waterproofness and high breathability plus increased salt water resistance.		Fabric is windproof and protects therefore against wind-chill (which causes massive heat loss).
	HB Membrane used for 3+1L fabrics offers extreme waterproofness and high breathability plus increased salt water resistance.		Extra tough shell fabric for allover heavy duty requirements.
	Performance hydrophilic PU Membrane is a nonporous membrane which provides very high breathability and waterproofness. Its durable function is based on a physical and chemical principle.		Used for areas with high exposure to friction/abrasion.
	NX Membrane used for 3L fabrics offers extreme waterproofness and top level breathability.		Breathability (Moisture vapor transmission rate). The higher the value the better is the breathability. There is no conversion between RET and MVTR and one will not determine the other.
	DT Coating used for 2,5L fabrics offers reliable waterproofness and high breathability.		Breathability (Resistance to evaporative transmission). The lower the value the better is the breathability. There is no conversion between RET and MVTR and one will not determine the other.

x					x	x		Stretch

	Ultra violet protection 30 – 50		Quick Dry fabric plus anti-odour.
	Anti-bacterial finish prevents bacteria to establish and prevents odour.		Patented fibre mix for moisture management and comfort.
	Fabric dries especially quickly.		Wool blend fibre mix to merge advantage of wool and synthetic fibres. Increased thermal insulation by wool and the "no wind" membrane make Technowool articles warm and cosy.
	Insulation padding with high ratio heat retention/weight. Warm, soft, lightweight.		Ventiprene is a patented revolutionary technology, breathable neoprene. Body heat and sweat escapes as water vapor. Excellent thermal protection and four-way stretch.
	Functional knit fabric. Extraordinary heat insulation and breathability. Soft and stretchy.		Extra high offshore collar with spray protector and adaptable high visibility hood tucked away inside collar.
	Functional knit fabric. Effective moisture management combined with insulation and stretch comfort.		Lightweight product (in relation other product same category).
	3M Scotchlite reflex element with high retroreflection to support visibility and salvation.		Zip-in option provided for system midlayer jackets Luca/Lucia and Carlo II Fleece jacket.
	Flexible fabric with stretch ability to offer extra comfort and freedom of movement.		All seams are fully taped for a completely waterproof garment.
	Extra strong Polyamide fibres for areas exposed high strain and abrasion.		Hood for weather protection, fully adaptable and waterproof.
	The ultimate dry experience in lightest weight. Wicks 3x better than other wicking fabrics. UV protection included.		Pocket for AIS beacon. With eyelet for attachment.
